

# The Advanced Classroom Training Table Cable Management Enclosure

The Kendall Howard® Advanced Classroom Training Table Collection balances professionalism and practicality in a truly universal solution. The ACTT system will easily convert an out-dated, uninspiring training room into an engaging, respectable atmosphere by providing a clean, focused learning space that is suitable for any training or work space.

The Training Table Lockable Cable Management Chassis encloses and hides the surface and modesty panel cable entrance points, providing a clean, polished look. The Cable Management Chassis also provides a cable lock point for computer security devices to be secured to, protecting community or public equipment. Multiple knock-outs provide easy cable routing down to the CPU or from desk to desk. The included fan pattern allows you to install an optional fan kit, providing additional airflow especially when heat generating equipment is housed inside.
