

ESD WORKBENCHES

Approach your important work safely without a fear of electrostatic damage

CONDUCTIVE LAMINATE WORK SURFACE

Kendall Howard's ESD Workbench work surface has a low electrical resistance and will diffuse static charges to ensure protection of sensitive devices during assembly. Resistant to most common solvents, solder and fluxes creating an extremely durable surface.

COMMON GROUND POINT-

Our ESD tables can be grounded two ways. A 10' long ground wire is provided to attach to an earth grounding point. The second ground is built into a leg leveler with a unique aluminum boot. Workbench also includes a designated wrist strap grounding point.

96" ESD WORKBENCH

Item #: ESDW-9630-1000

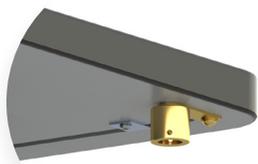

60" ESD WORKBENCH

Item #: ESDW-6030-1000

48" ESD WORKBENCH

Item #: ESDW-4830-1000
